

GitHub Personal Access Token (PAT) Generation Guide

Sveltia CMS Authentication for Eros Inc.

Target CMS Portal: <https://erosinc.in/admin> / <https://erosinc.vercel.app/admin>

Repository: github.com/erosinc-dev/erosinc-dev

Purpose: Authenticate non-technical team members & admins to publish news articles and upload gallery photos directly.

■ Step-by-Step Instructions

Step 1: Sign in to GitHub

1. Open your web browser and navigate to:

■ <https://github.com>

2. Log into your GitHub account (e.g. [erosinc-dev](#) or your personal GitHub account).

Step 2: Open Developer Settings

1. Click your **Profile Avatar** in the top right corner of GitHub.
2. Click **Settings** from the drop-down menu.
3. On the left sidebar, scroll down to the bottom and click **Developer settings**.

Step 3: Access Personal Access Tokens

1. In the left menu, click **Personal access tokens**.
2. Select **Tokens (classic)**.

Step 4: Generate a New Token

1. Click the **Generate new token** button in the top right corner.
2. Select **Generate new token (classic)**.
3. If prompted for security verification, enter your GitHub password or 2FA code.

Step 5: Configure Token Settings & Scopes

1. **Note (Description):** Type a clear label, such as:

[Eros Inc CMS Access](#)

2. **Expiration:** Select **No expiration** (or 90 days/1 year based on company security preferences).
3. **Select Scopes (Permissions):**

Check the box next to [repo](#) (Full control of private repositories).

(This gives Sveltia CMS permission to save blog posts and upload photos to the [content/news](#) and [public/gallery](#) folders).

Step 6: Generate and Copy Your Token

1. Scroll down to the bottom of the page and click the green **Generate token** button.

2. Your token will appear on screen (starts with `ghp_...` or `github_pat_...`).

3. ■■ **IMPORTANT:** Click the copy icon next to the token and paste it somewhere safe!

(GitHub will only show you this key ONCE. If you lose it, you can simply generate a new token).

Step 7: Log in to Sveltia CMS

1. Go to your live CMS login page:

■ <https://erosinc.in/admin>

2. Paste your copied token into the authentication box and click **Log In**.

3. You are now logged into the Eros Inc. Content Management System! ■

■ Security Best Practices

- **Keep Token Confidential:** Treat your token like a password. Never share it publicly.
- **Revoking Access:** If a team member leaves, you can immediately delete their token under **Developer settings** -> **Personal access tokens**.
